Introduction

RoboRAVE is an international robotics competition with Headquarters in the USA. The competition has accumulated 18 years of history in the United States and each year, it continues to attract thousands of students to participate. Due to RoboRAVE's educational and engagement focus, the events have been rapidly developing over recent years. The 2021 RoboRAVE Australia event will be held in the University of the Sunshine Coast Stadium, Queensland, Australia on Sunday May 30 with VIRTUAL Online entries opening a week prior for INTERNATIONAL teams that cannot attend this year.

During the RoboRAVE competition, around 400 Australian students will design, build, and program a fully autonomous robot to complete a challenge, while international teams complete the same challenge in the RoboRAVE virtual coding environment. In the preparation process for the competition, students develop strong robot coding and engineering skills.

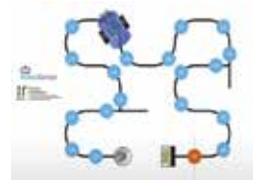

RoboRAVE Australia's influence to date:

32 RoboRAVE workshops involving 105 teachers and 1010 students, have been conducted. The RoboRAVE Australia Facebook page has 1043 followers, 951 likes and over 13 000 views on Youtube.

Tasks:

- A-Maze-ing Challenge
- Alpine Challenge
- Entrepreneurial
- Sumobot Challenge
- Line Following Challenge
- Fastbot Challenge
- Megabot Challenge

Robo Sensei Online Competition

RoboCoast workshop venues and participating schools

Your sponsorship will fund a proven strategy to engage and upskill the youth of Australia in robotics and engineering. RoboRAVE Australia is an ideal location to showcase your company to event visitors, international online-teams, media and RoboRAVE's substantial fan base. Use the event to test your products, gain feedback, conduct market research or make sales.
